

## 80 nodes network – 30k iterations - PY prior

## SBM model

K = 5 , 2.3 mins

K = 7 , 3.08 mins

K = 10 , 4.34 mins

K = 15 , 6.31 mins

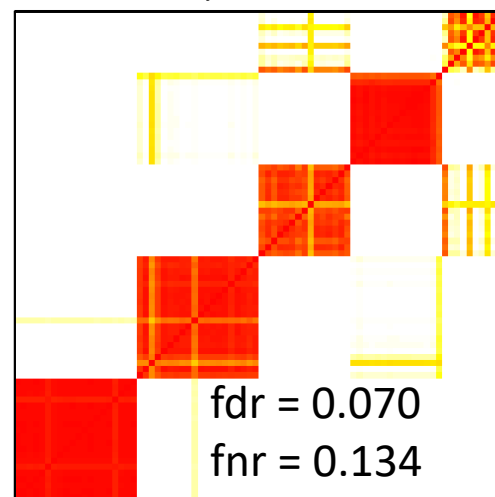

## Class – Distance model

K = 5, 3.4 mins

K = 7, 4.31 mins

K = 10 , 5.6 mins

Even for 100k iterations, burning  
90k fdr and fnr are the same

K = 15 , 8.04 mins
